Corner Crimper M 102

- Joins the Corner of Aluminum Profiles by Crimping the Corner of the Profile in to the Wedge
- High Pressure Capacity bellows Cylinder (Maintenance Free) Which avoid the corner deform and enhance the corner connection efficiently
- Pneumatic Operating System Sustains high Pressure Power
- Ability to work with all types of Profile
- The crimping blades which is specially made by carbon steel can be adjusted easily
- Easy to Adjust and Easy to Operate
- Standard equipped with support arms and press blades
- Step by step control of the operation by means of foot pedal

▶ AN ISO 9001:2008 CERTIFIED COMPANY

Technical Features

- Power Supply Made to Order
- Maximum Profile Height 100mm
- Maximum Profile Width 140mm
- Compression Force 40 kN (4t)
- Pneumatic Drive
- Compressed air supply 10 Kg
- Air Consumption per working cycle 30l
- Minimum Profile Height 15mm
- Machine Length 650mm, Width 425mm, Height 1150mm, Weight 205Kg.

Optional

- Supporting Table for Pre- Assembly
- Special Press Blades
- Extra parts
